the European Union

# InPlaLabs

InPlaLabs aspires to develop a Transnational Network of multi-stakeholder **Integrated Planning Labs** for knowledge co-creation on climate-resilient planning.

The InPlaLabs Network will be a platform for interacting between different target groups related to planning from different perspectives.

**#participatory approach #people-centric perspective  
# resilience to climate challenges.**

## # Integrated Planning

Integrated Planning reflects a holistic approach to spatial development, combining urban planning, mobility, and participatory processes to ensure sustainable and functional urban communities. Our focus extends beyond traditional rationales where planners acted independently, thus fostering multi-disciplinary collaboration to address the complex challenges of modern cities.

## # Network

The InPlaLabs Network is a gathering of professionals, academics, policymakers and community leaders connected across various places, but united by a common goal: to reshape the future of urban planning towards inclusivity, sustainability, equity and resilience.

**Systemic transnational  
collaboration between  
different Labs**

**Inclusive and participatory  
approach during the  
Network's activities**

**Knowledge co-  
creation between  
various planning actors**

**Upskilling planning  
actors on climate-  
resilient integrated  
planning**

**Cultivating an  
integrated  
planning culture**

**A long-term hub  
bringing together  
different stakeholders**
